Powertube 400

Powertube 500

Powertube 625

Powertube 750

Fact

The patent, design and engineering is made by Asbjørk Stanly Mogensen in 2011

It's made for the Protanium BV a company owned by Accell Group NV

Accell Group decided to lease it out to BOSCH electric bike division

It's used on more than 135 Bicycle brands around the globe

The patent runs out in 2028

About

The patent is about having the battery in the frame

You can cut the toptube (Ladies bike) and the frame will remain strong

It's patented by Asbjørk Stanly Mogensen and Patrade in Kolding for Accell Group NV

Economic

So far the patent made 135 Million Euro in Royalty for Accell group NV

The agreement was 1,5 Million Euro on lease for the patent + 10 Euro per bike sold by BOSCH

Patents Assigned to Protanium B.V.

Bicycle frame with integrated and detachable battery

Patent number: 7934576

Abstract: The present invention concerns a bicycle frame, including a number of frame elements, preferably tubes, where the frame elements are interconnected and constitute a construction with so great rigidity that the cycle frame does not change its geometrical shape under usual load, where an electric battery system is at least partly embedded in the frame, including at least one battery pack for storing electric energy for use in connection with equipment, such as comfort equipment and/or safety equipment on a bicycle, including an electric auxiliary motor, where the part of the frame adapted to mounting a battery pack is constituted by a hollow section, the hollow section being a multiple chamber section, where a battery pack is predominantly arranged in a cutout in the multiple chamber section so that at least one chamber in the multiple chamber section is substantially intact. Thus is obtained a cycle frame with a cutout for a battery pack, where the frame has great rigidity.

Type: Grant

Filed: March 8, 2008

Date of Patent: May 3, 2011

Assignee: Protanium B.V.
