BOSCH

Patent designer

Powertube 400

Powertube 500

Powertube 625

Powertube 750

Fact

The patent, design and engineering is made by Asbjørk Stanly Mogensen in 2011

It's made for the Protanium BV a company owned by Accell Group NV

Accell Group decided to lease it out to BOSCH electric bike division

It's used on more than 135 Bicycle brands around the globe

The patent runs out in 2028

About

The patent is about having the battery in the frame

You can cut the toptube (Ladies bike) and the frame will remain strong

It's patented by Asbjørk Stanly Mogensen and Patrade in Kolding for Accell Group NV

Economic

So far the patent made 135 Million Euro in Royalty for Accell group NV

The agreement was 1,5 Million Euro on lease for the patent + 10 Euro per bike sold by BOSCH

Patents Assigned to Protanium B.V.

Bicycle frame with integrated and detachable battery

Patent number: 7934576

Abstract: The present invention concerns a bicycle frame, including a number of frame elements, preferably tubes, where the frame elements are interconnected and constitute a construction with so great rigidity that the cycle frame does not change its geometrical shape under usual load, where an electric battery system is at least partly embedded in the frame, including at least one battery pack for storing electric energy for use in connection with equipment, such as comfort equipment and/or safety equipment on a bicycle, including an electric auxiliary motor, where the part of the frame adapted to mounting a battery pack is constituted by a hollow section, the hollow section being a multiple chamber section, where a battery pack is predominantly arranged in a cutout in the multiple chamber section so that at least one chamber in the multiple chamber section is substantially intact. Thus is obtained a cycle frame with a cutout for a battery pack, where the frame has great rigidity.

Type: Grant

Filed: March 8, 2008

Date of Patent: May 3, 2011

Assignee: Protanium B.V.

Designer and engineer: Asbjoerk Stanly Mogensen

Renauld is working at Easybike in Paris. Every morning he is driving 30 to 40 minutes on his bike through the dense traffic of Paris. Renauld relies on his ebike. With such a distance there is no room for errors on his ebike. For Renauld, his bike is as important as his car.

"I am electric"

This is the way I roll. I like to be in the first line of everything. Like a sparkling diamond in the sky. My life is simply a pure process as you can see. I am electric. Are you?

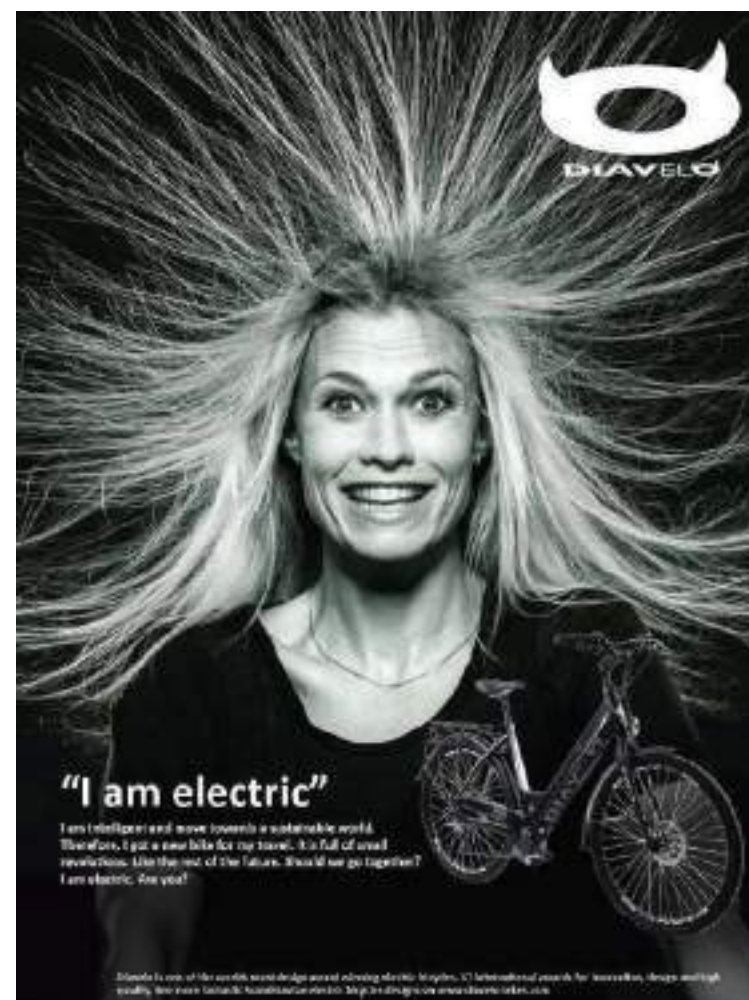

Diavelo is one of the world's most design award winning electric bicycles. It has national awards for innovation, design and high quality. See more facts and details about Diavelo design on www.diavelo-bike.com

"I am electric"

I take about my stuff and all my stuff. I connect with all my electric machines, just like they connect with me. I have become a part of a great, electric family as you can see. I am electric. Are you?

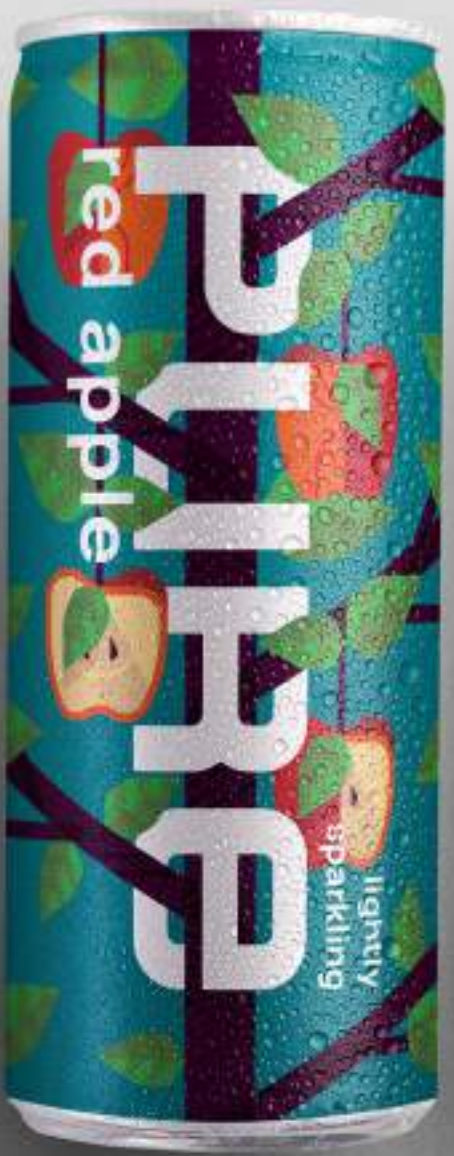

Diavelo is one of the world's most design award winning electric bicycles. It has national awards for innovation, design and high quality. See more facts and details about Diavelo design on www.diavelo-bike.com

"I am electric"

I am intelligent and move towards a sustainable world. Therefore, I got a new bike for my travel. It is full of small revolutions, like the rest of the future. Should we go together? I am electric. Are you?

Diavelo is one of the world's most design award winning electric bicycles. It has national awards for innovation, design and high quality. See more facts and details about Diavelo design on www.diavelo-bike.com

OPPORTUNITY | MANUFACTURING PROCESS

As the frame will come in one size only, there's an opportunity to produce the frame from left and right "shells", which are then welded with a centre seam. This process provides advantages in more refined surface transitions, faster production cycles and less parts = less tolerances.
